MERN-Stack Index

DOM
Click a button and add an element -
      Milestone 05 - Js-Dom-Main - Script-Copy.js
      Milestone 06 - dom.js
Type and delete something - Milestone 05 - DOM-Events-main - more-events.html
Type and add element -
      Milestone 05 - Comments.html
      Milestone 06 - click and add a child to its parent - dom.js
Enabling and disabling a button - Milestone 05 - more-events.html
Bubble AND delegate - Milestone 05 - clicking and removing child - delegate.html

Extra
Map, filter, find - Milestone 06 - MoreES6 - filter-find.js

JSON
Search and get dynamic data - Milestone 06 - Mealdb.js
Delete previous search result - Milestone 06 - Mealdb.js - line 26
Aforementioned project via async-await || try catch - Milestone 06 - Mealdbasynch.js

All data types of javascript - Milestone 06 - data-types.js
Undefined - null - Milestone 06 - undefined.js
Scope, global, hoisting - Milestone 06 - scope.js
Closer - Milestone 06 - closer.js

Object
Function Method of an object - Milestone 06 - method.js
Object.keys and Object.entities - loop through objects - Milestone 06 - loop-object.js
Calling a function from the property of an object - Milestone 06 -call-apply.js
Binding and constantly changing data of an object - Milestone 06 - bind-method.js
Github Private to Personal Repository - Video 36_5.5

Browser
*Location API, hash, href, query - 38-3 Video
History API navigate - go forward, back, refresh - 38-4 Video

Cookie
Data manipulation in cookie and local storage -
      38-5 Video 38-7&8 - Milestone 07 - Browser API - cookies.js && shopping .js
local storage summary - Video 42-7

React
countryDB using map and destructuring - Milestone 08 - video 44.3

useState, useEffect - Milestone 08 - video 45.8 - react-core-concept2.js
Multiple data to a child - Milestone 08 - video 46.6 - Countries.js
Props vs states - Milestone 08 - video 47.5 - understanding-react.js
export -import - component - Milestone 08 - video 47_5-1 - react-side-things
localStorage-fakeData - Milestone 08 - react side things - utilities - fakedb.js
add to cart || remove form cart - Milestone 08 - fakedb.js
data-load in project - Milestone 08 - ema-john-simpel - shop.js-video 48.3
Button - Milestone 08 - ema-john-simpel - shop.js-video 48.6
Display local storage cart to UI - Milestone 08 - ema-john-simple-localStorage - shop.js - video 49.4 + 49.5
Search and show product in UI - Miletrone 08 - em-jh-sm-lc- shop.js - video 49.6 - shop.js
Rating in react - Milestone 08 - em-jh-sm-lc- video 49.7 - product.js

React Project Wrap up
Simple React Bonus - Milestone 08 - React Mealdb
Prop drilling - Milestone 09 - Grandfather
Context API - Milestone 09 - Video 54.8 - Grandfather

Authentication
Conditional formatting signIn signOut - Milestone 10 - Video 56-9 - simple firebase auth
Type email, password and console.log() - Milestone 10 - video 57.3 - firebase-atuh-2
Password validation RegEx - Milestone 10 - video 57.5 - firebase-atuh-2
Email verification, forget and reset password - Milestone 10 - video 57.7 - firebase-atuh-2
Update username - Milestone 10 - video 57.8 - firebase-atuh-2

Node || MongoDB
Dynamic id search and ?usequery parameter - Milestone 11 - Video 63.5 - node second index.js
Post data - server - UI - Milestone 11 - Video 63.8 - load my data
Mongodb connection - Milestone 11 - Video 64.4 - node-mogo-crud-1
Send data to server - Milestone 11 - Video 64.5 - node-mongo-crud-starter
Load data and show in UI - Milestone 11 - Video 64.7 - node-mongo-curd-1 & starter
Delete data and Update data - Milestone 11-Video 64.8&9 64.5-2 - node-mongo-curd-1 & starter
**Axios-post to mongodb - Milestone 11 - Video 65.6 - addServices
**Axios-delete from mongodb - Milestone 11 - Video 65.6 - addSevices
*Pagination via query parameter - Milestone 11 - Video 66.5&66.6 - ema-john shop.js + index.js
*Pagination cart update solve using key-Milestone 11 - Video 66.7 - useCart.js + orderReview.js
Filter user info by email address - Milestone 11 - Video 67.8
JWT token - Milestone 11 - Video 67.8,9&10
Handle 404 Error - Milestone 11 - Video 67.11

Final Project
MUI date picker - Milestone 12 - Video 70-2 - AppointmentHeader.js>Calendar.js
Set dynamic calendar with date lifting up - Milestone 12 - Video 70-3
Dynamic modal - Milestone 12 - Video 70-6

Form inside a modal - Milestone 12 - Video 70-8

Multiple onChange in one state - Milestone 12 - Video 71-2 - Login.js

AuthContext and useAuth Hook - Milestone 12 - Video 71-6 - AuthProvider.js & useAuth.js

Show error alert MUI - Milestone 12 - Video 71-8 - useFirebase.js

Handle redirect and show name, email form useAuth to appointment modal - video 72-2

Get client-side data via an event handler - Milestone 12 - Video 72-4 - BookingModa.js

Post booking to database and drill child success - Milestone 12 - Video 72-5 - BookingModa.js

Get specific data by query email - Milestone 12 - Video 72-7 - index.js (severside)

Display specific user's data in a table - Milestone 12 - Video 72-8 - appointments.js (dashboard)

Filter by date - Milestone 12 - Video 72-8 - appointments.js & dashboard.js + index.js (server)

Save user in database - Milestone 12 - Video 73-2 - useFirebase.js

*Upsert google user in database - Milestone 12 - Video 73-3 - useFirebase.js + index.js

*Nested Routing Sidebar - Milestone 12 - Video 73-4 - dashboard.js

*Set admin role in database - Milestone 12 - Video 73-5 - makeAdmin.js + index.js

*Only admin can change or add data - Milestone 12 - Video 73-6 - makeAdmin.js + dashborad.js + index.js

Initilaize idtoken in useFirebase and export - Milestone 12 - Video 73-7 - useFirebase.js + makeAdmin.js

Install token and verify middleware - Milestone 12 - Video 73-8 - makeAdmin.js + index.js
